**CapitalVision® now on GSA Schedule**

**Orlando, FL, May 19th, 2008** — The Solution Design Group, Inc. (SDG) announced today that its CapitalVision® software, used by airport managers and consultants to manage capital programs for airports, is now available through Government Marketing and Procurement, Inc. (GMP) on the General Services Administration (GSA) Schedule 70 – Contract GS-35F-0858N.

“We are very pleased that CapitalVision® is now available via the GSA schedule. The schedule streamlines the procurement process and allows our government customers to enjoy the benefits of CapitalVision® in a more timely fashion. Many large capital projects spend up to a million dollars per day during peak construction – and having CapitalVision® available sooner rather than later can have a substantial impact on the management of a capital program.” said Tom Strange, President and CEO of SDG.

The Information Technology (IT) Schedule 70 was established by GSA to assist federal government agencies with their procurement of IT products, services, and solutions as needed to meet their agency IT missions. This Multiple Award Schedule grants agencies direct access to the commercial experts who can thoroughly address the needs of the government IT community. Unlike any other Government Wide Acquisition Contract (GWAC), under the Cooperative Purchasing Program, state and local government agencies can purchase many IT product and service items from GSA’s Schedule 70. The IT Schedule allows for choice, flexibility, ease of use, and access to quality businesses in the IT arena. The link to the GSA Advantage website is <https://www.gsaadvantage.gov>.

CapitalVision®, which is available on a subscription basis or in an enterprise version, is a unique software solution that manages the relationships between capital program funding sources, projects, and associated contracts. It is designed specifically to allow the owner or operator to have immediate access to project expenditures on a funding source by funding source basis. It bridges the gap between the typical project management systems and financial accounting and ERP systems and provides the reports needed by funding providers such as the FAA.

**About The Solution Design Group, Inc. (SDG)**

SDG is a software developer and information technology consulting firm that focuses on capital program management for the aviation and transportation market. The principals of SDG have over 75 years of collective experience in the aviation industry and have provided software or services for nearly 100 different airports around the world. SDG’s offices are in the Washington, DC area and in Orlando, Florida.
